

Technology fueled disruption has impacted every industry in recent years. We help to re-align technology, business & processes enabling organizations to exceed desired outcomes and KPIs. Discover the driving technologies behind HighVail and how we are able to consistently deliver [high availability](#).

## DevOps

While DevOps as a discipline has only been around for a decade, the HighVail team have been mastering IT operations and the underlying technology for much longer, evolving from enterprise servers and virtualization to container platforms and automation. [DevOps-as-a-Service \(DaaS\)](#) is a set of tools and practices that facilitates collaboration between an organization's software development and operations team ultimately delivering applications and services with agility and high velocity. With DaaS, you will gain direct access to our virtual engineering team comprised of highly skilled experts with unmatched capabilities in containers, automation and DevOps tools. [Learn More >](#)

## Containers & Platform

Are you ready to run your applications on a bullet-proof container platform? We started our container journey way back in 2004; fast-forward to today, and we're still doing interesting things with next generation modern container platforms and technology. We developed a [Container Quickstart](#) program designed for customers who are new to container technology, and includes a 30-day proof of value report, capturing business benefits, cost reductions and efficiency gains. Containerizing new and existing applications, regardless of where they run, is what we do well. When coupled with orchestration and automation, the benefits are limitless! [Learn More >](#)

## Automation

Our experts strive to tackle the most stubborn challenges and have a deep-rooted belief that life is better when difficult things are automated. We understand the complexities of legacy IT environments and how to find the balance between the desire for innovation and the realities you are facing. At HighVail, we architect and design for the world of Hybrid Cloud with a focus on availability, performance and flexibility. Let us do the heavy lifting when it comes to managing and optimizing to provide benefits which are ongoing and cumulative. HighVail will build and deploy with the enablement of our customers in mind, wherever they might be on the path to cloud adoption.

Our [Ansible Automation Proof-of-Value QuickStart](#) was driven by customer feedback and provides battle tested benefits to businesses including less time to revenue, reduced costs, and greatly improved productivity and efficiency to optimize potential to remain agile in today's competitive marketplace. ## Training & Enablement

Technology moves quickly, and often times your teams aren't able to keep pace with what's new. HighVail helps to bridge gaps through our training and enablement solutions. Whether it is Kubernetes, automation, containers & platforms, or hybrid multi-cloud, HighVail can deliver an enablement solution that's right for you. We design custom training that is tailored specifically to your needs. [Learn More >](#)

## Hybrid Cloud

Most businesses have decided to use the cloud in one way or another; usually starting with a "life and shift" of applications, but will often stall when trying to figure out what happens on day two. Utilize our expertise in data protection and disaster recovery and expand it with leading edge technologies like data fabric to the hybrid cloud. We can also help you save on costs by consolidating your monthly cloud billing without any changes to your current infrastructure. [Learn More >](#)

## Data Management

We ensure that our customers have a cloud strategy that supports high availability, performance and flexibility and gets you through Day 2. Whether you are using multiple data centers, public clouds, private clouds, or a combination, we can help reduce complexity, all while avoiding vendor lock-in. Whether your business fully lives in the cloud or only part of your workloads have migrated, our experts can help you manage your data and enable you to make the best strategic decisions around cloud-connected infrastructure and storage.

HighVail also offers a flexible and customized [Backup-as-a-Service \(BaaS\)](#) engagement model. Our offering leverages our proven industry expertise delivered by our team of senior technologists. Let us eliminate the worry, frustration & considerable cost of managing your environment. [Learn More >](#)

## About HighVail

Our focus is on simplifying the transition to new technologies. We architect, integrate and automate hybrid infrastructures – enhancing the utility of existing technology and delivering advice for modern solutions. With roots in IT infrastructure, [DevOps](#) and [Open Source](#), we support our clients as they navigate through the complexities of modernization, capitalizing on the value captured by transformation.

**All engagements will begin with a virtual Discovery Session at no charge to you. This is where we can work with you to determine and consult on your current business technology needs. To book a session with a HighVail expert, [click here.](#)**
